

### **Group 3 (Snazzy Meatballs) Milestone 3**

Completed Features:

- HTML Webpage
- Navbar
- Color Wheel
- Color Picker
- Concept preview images

The following features worked in our Demo:

- HTML Webpage
- Color Wheel
- Color Picker
- Lucidchart organization and outline

The following issues were discussed:

- Organization of workflow
- Double-work where multiple project members worked on the same issue separately.
- Lack of maintenance of the Jira webpage

The TA suggested:

- That we work on the maintenance of our Jira page
- That we use our Jira page to avoid doublework and keep workflow organized
- That every team member should know what every other team member is doing at all times.

Individual contributions from the various team members included:

- Chris worked on the Color picker and RGB to Hex conversion
- Zach worked on the Color Wheel and Navbar
- Catherine worked on the concept preview images
- Ethan built the HTML webpage framework.
